

## Science Toolkit: Grade 5 Objective 2.A.2.c

Student Handout: Science: Grade 5 Objective 2.A.2.c

Standard 2.0 Earth/Space Science

Topic A. Materials and Processes That Shape A Planet

Indicator 2. Cite and describe the processes that cause rapid or slow changes in Earth's surface.

Objective c. Cite examples that demonstrate how the natural agents of wind, water, and ice produce slow changes on the Earth's surface such as carving out deep canyons and building up sand dunes.

Selected Response (SR) Item

Question

Wind changes the surface of Earth.

Which of these land formations is a result of transportation and deposition by wind?

- A. a delta
- B. a glacier
- C. a sand dune
- D. a mountain peak

Correct Answer

C. a sand dune

Question

Wind changes the surface of Earth.

Which of these land formations is a result of transportation and deposition by wind?

- A. a delta
- B. a glacier
- C. a sand dune
- D. a mountain peak
