

## Reading Like a Scientist

When Scientists read, they-

- ask questions** based on facts.
- try to **understand** science words.
- think **pictures** in the book are important.
- read back and forth** between the words and the pictures because it helps to understand the ideas.
- make **predictions** about what they read.
- think and make their own pictures in their thoughts while reading.**
- read important sentences again.**
- read **closely** about an idea or experiment.
