

Name: _____ Date: _____

Researching an Inventor

Directions: Read your biography to answer the following questions about your inventor.

Inventor: Benjamin Banneker

Pages: _____ - _____

Time Period: 1700's

Invention	How did the invention make life better?	How has this invention been adapted for today?
First wooden clock in North America	Helped people keep more accurate time. Benjamin used the clock to measure the movement of the stars which helped him find the position of the stars, moon, sun and planets. This information helped him publish an almanac.	Clocks can be found everywhere now and are used to communicate on daily basis. Digital clocks make reading the time quicker.

Draw a picture to show how the invention is still be used today.
