

Philo's first prototype exploded.

When Philo was 3, he saw a steam powered train. This started his interest in how things work.

In 1927, Philo made the first TV image.

Philo found more businessmen to give him money so he could make another prototype.

Two businessmen gave him \$6,000 for Philo to use on developing a TV.

When Philo was 11, his family moved to Idaho where they had electric in their house. He found some magazines that talked about the idea of a TV and he dreamed of inventing it.

When Philo was 13, he won an invention contest.

When he was 22, Philo was credited with the invention of the TV.

When he was 14, Philo got an idea about how to make a TV while plowing the fields.
